RODRIGO FERNANDES

As a Software Developer, I'm a very tenacious guy. I never run from a challenge, as I see them as a very good source of knowledge and self improvement. Since I was little I've embraced the struggle and I've become very familiarized with it, that said, I don't stress out when I'm struggling. Instead, I stop for a minute, I analyze why I'm struggling, and then I find a way to overcome the struggle.
